

Hoover Electric Power

September 26, 2012

Volume 1, Issue 1

Colorado River
Commission of Nevada

Inside this issue:

Hoover Electric Power Allocation Opportunity	1
About the Colorado River Commission of Nevada	1
Who to Contact for more Information	2
October Workshop	2

Special points of interest:

- ♦ **October 30, 2012 Workshop**

Hoover Electric Power Allocation Opportunity & What this Means to the State of Nevada

- Low-cost, clean renewable energy for Nevada
- 50-year contract term (2017-2067) for existing Nevada contractors & new Nevada contractors
- Existing Nevada contractors will retain 95% of current Hoover Power Allocation
- Western Area Power Administration (WAPA) is planning to begin this fall/winter of 2012 its formal marketing & allocation process for 69,170 kW (69 MW) of contingent capacity & 151,013,000 kWh (151,013 MWH) of associated firm energy in Arizona, California & Nevada
- Colorado River Commission of Nevada (CRCN) is planning to begin about the spring of 2013 its marketing & allocation process for 11,510 kW (11.5 MW) of contingent capacity & 25,113,000 kWh (25,113 MWH) of associated firm energy in Nevada
- All Nevada allottees must be within the marketing area, which include portions of:
 - Clark County
 - Lincoln County
 - Nye County
 - White Pine County
 - Esmeralda County
 - Mineral County
- **Attend our October 30th, 2012 Workshop**

About the Colorado River Commission of Nevada

The Colorado River Commission of Nevada (CRCN) is an executive agency of the State of Nevada and has been serving the communities of the State by responsibly managing and protecting our Colorado River water and power resources for more than 75 years.

The CRCN is responsible for Nevada's allocation of hydro-

electric power generated and marketed by the federal government. Nevada's allocation of hydroelectric power from Hoover, Parker, and Davis Dams, and the Salt Lake City Area Integrated Projects is purchased by the CRCN through its contracts with Western Area Power Administration (WAPA) and delivered to industrial and whole-

sale customers in Southern Nevada.

The CRCN, on behalf of the State of Nevada, owns, operates and maintains 17 high-voltage substations, 32 miles of 230-kV overhead transmission lines, 4 miles of 69-kV overhead transmission lines, and 11 miles of 69-kV underground transmission lines.
