

This is the most current map but does not reflect VEA's most current contract awards. VEA was recently awarded the contract for the DOE/Nevada National Security Site and has purchased the electric utility holdings on Creech Air Force Base in Indian Springs. The transition process for these contracts begin on November 1, 2012.

Contact information for someone inquiring about electric service should be directed to our New Business Representatives in the Customer Service Division. Other inquiries concerning transmission service, generation interconnects or new business relocation services can be directed to our Governmental Relations and Marketing Department.

A call into our office (1-775-727-5312, 1-800-742-3330) with a good description of the inquiry will get the interested party directed to the right department.
