May 11, 2021

Summary

Lake Powell

- Drought conditions are causing below average inflow forecasts.
- Unregulated inflow for water year¹ 2021 is forecasted at 34% of average.
- Upper Basin snowpack peaked at 83% of the seasonal average.

Lake Mead

- Lake Mead is forecasted to decrease about 11 feet in elevation by the end of calendar year 2021.
- Lower Basin conservation programs have conserved roughly 3.5 million af or about 40 addition feet in Lake Mead.

Nevada Water Supply

- Southern Nevada has about 9 years of water supply banked. ²
- **In 2020, Southern Nevada used 15% less than its annual allocation.**

Storage	Elevation (f)	% Capacity	Change since last year
Lake Mead	1,078.2	38%	-17.5 ft
Lake Powell	3,561.7	35%	-37.8 ft

Data retrieved May 5, 2021

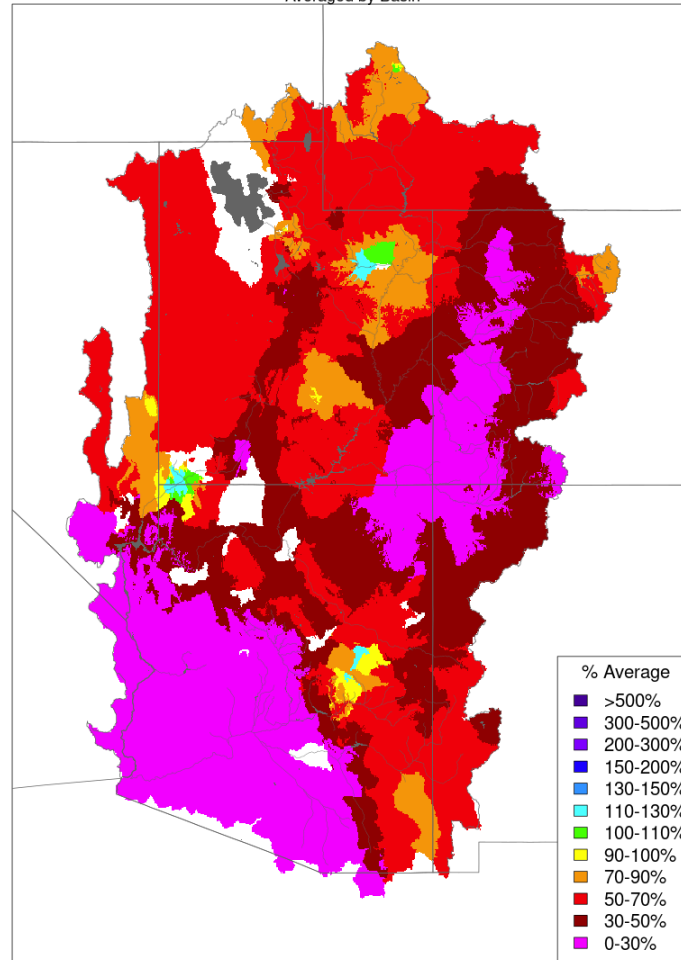

¹ Water year is defined as October through September.

² Based on 2020 consumptive use and storage volumes through 2020.
