Summary

Lake Powell

- Drought conditions are causing below average inflow forecasts.
- Unregulated inflow for water year¹ 2021 is forecasted at 48% of average.
- Upper Basin snowpack is currently 76% of seasonal average.

Lake Mead

- Lake Mead is forecasted to decrease about 16 feet in elevation by the end of calendar year 2021.
- Lower Basin conservation programs have conserved roughly 3.5 million af or about 40 addition feet in Lake Mead.

Nevada Water Supply

- Southern Nevada has 9 years of water supply banked. ²
- In 2019, Southern Nevada used 22% less than its annual allocation.
